Esthetic Equipment

This multi-function unit is SUPERIOR QUALITY and is the most advanced system you will need. It allows the most perfect skin care modern technology can provide.

The 8 in 1 Function consists of a deluxe facial steamer with ozone and timer, 5 piece rotary brush unit, 3 piece glass vacuum, spray device - 2 bottles, woods lamp, high frequency with 4 electrodes, galvanic with roller and ball, and 5 diopter magnifying lamp.

This efficient and easy-to-care-for eight-function facial machine is a complete unit. Buy this complete facial machine and save several hundreds of dollars when compared to purchasing each piece separately. The multi-function facial machine also saves space as everything is centrally located on a single space-saving rolling platform with sturdy roller wheels. This allows you to switch easily from facial to other services by simply rolling the unit into a corner or out of the room completely. This complete unit comes with everything an esthetician will need to get started!

\$1295 (shipping quote done by zip code)

Deluxe Bed with Hydraulic Lift. This facial bed has a 4 inch deep cushion and is 72 inches long, 24.5 inches wide and 25-30 inches in height. This bed has removable arms and can rotate like a hair styling chair. If you do not need the hydraulic lift and swivel then you may want to purchase a standard facial bed. The Hydraulic Facial Bed is more expensive and more expensive to ship. Permanent Makeup Artists like the fact that it swivels. Estheticians like to have the option of raising it or lowering it to save them from back pain.

The dynamic load on this bed is 350 lbs

\$695 (shipping quote done by zip code)

This steamer has an adjustable arm, 30 minute timer, automatic shut-off, ozone setting and large glass beaker. The arm can move up and down and swivel side to side. Aroma Therapy Oil can be put on the cloth that is located on the steamer arm where the vapor comes out! Use distilled water.

*Versatile arms that allow for clockwise, count clockwise, and up and down movement.

*A built in timer

*Shuts Off when water level is low

*Ozone Switch

Dimensions: Adjustable height: 36" to 41" Base: 23" x 23"

Steamer arm: 23"

Overall height: 54"

Weight: 26 lbs

\$250 (shipping quote done by zip code)

This facial bed is wide, sturdy and comfortable. It has a 4-5 inch deep cushion and is 70 inches long, 22 inches wide and 25 inches in height. This bed comes with a removable headrest with hole for face and removable arms. This Facial Bed is excellent quality and is therefore more expensive than others on the internet. It is great for Waxing and Tattoo Studios.

\$350 (shipping quote done by zip code)

This stylish hot cabinet will hold 24 Towels There is a UV light to keep your towels sanitized. This smaller cabinet is designed to fit in more restricted spaces.

\$200 (shipping quote done by zip code)

This unit is meant to keep the wax warm and comfortable for use, for extended periods of time. Keep 2 different types of wax warm at the same time for personal selection. Holds 2 14 oz. cans. There is an easy to use temperature control knob on the front of this unit.
\$125 (shipping quote done by zip code)

A variety of carts are available including ones with one or two storage drawers. This photo shows sturdy 3 shelf trolley measures 34 X 23.5 X 14 and comes on casters. Please deduct one inch for inside shelf measurements. There is 10 inches of space between shelves. The bottom drawer is 3 inches deep and comes with a lock and key for storing your valuables!
Prices are variable but start at \$125 (shipping quote done by zip code)

This lamp magnifies five times and will not harm the eyes. It comes on a stand with 4 castors for easy maneuvering.
This lamp is also offered without a stand and has a C clamp to hold the lamp while attaching to a trolley or table top. Please make a note in the comments box if you would like to purchase the lamp without the stand.
\$199 (shipping quote done by zip code)

Grace Medical has manufactured the Light Touch microdermabrasion system for over a decade. Featuring variation of price points dependent upon the power output. All Light Touch microdermabrasion systems work with diamond crystals, crystal free, and organic polishing grains. Lifetime warranty is offered on all systems purchased directly and startup supplies and training are inclusive in the purchase price
Prices start at \$2995

Ultrasonic skin scrubbers utilize a process called cavitation to make water molecules rotate at a very rapid process, which assists in the breakdown of the stratum corneum layer. They are a great benefit to enhance the microdermabrasion or chemical peel process when used both before and after the procedure (for product penetration afterwards). Don't be fooled by the less expensive scrubbers on the market. They tend to break down quickly and don't have the power at 25,000 cycles per second that our systems deliver.
\$495

Scope on a Rope interfaces with a PC or an iPad/iPhone for you and your client to visualize their skin. Polarizing lens allows you to see the surface and below the surface, save and email the images to create a powerful marketing tool for your practice. Comes with 30X lens and can purchase additional lenses.
\$500 for USB; \$625 for wireless.

LED Photofacial Light therapy has been a critical part of skin care treatment over the past decade. Since NASA published the first clinical study documenting an increase in cell turnover at one hundred times the normal rate, skin care professionals have seen the difference a single treatment can make. Using a combination of red, infra-red and blue wavelengths to reduce inflammation post-exfoliation, and to increase cell turnover has been nothing short of remarkable with this technology. The initial cost of LED lights were expensive, however, the induction of LED technology into a variety of applications has cut manufacturing costs down extensively. Benefits can be seen in as little as 90 seconds. Hand held lights are also available for under \$500 for a pair.

LED Panel Lights with heavy duty Lights base w/wheels \$3000 (shipping costs determined by zip code)

Microcurrent technology is used in a series of treatments to stimulate the dermis and muscles of the face. While lower end systems populate the marketplace with less than stellar results, the Contour Ultra uses multiple frequencies and multiple leads to lift the face and generate new cell stimulation for the increased production of ATP, collagen, elastin and fibroblasts. Visible results are witnessed in a single treatment, however a series of treatments is needed for the best results.

Contour Ultra Microcurrent \$6500 (includes training)

Medilift face and body microcurrent treatments are the "mac-daddy" of treatments in the industry. With twelve leads of hookup capability, users can hook up face and body at the same time with full automation of treatments. This is the treatment that Hollywood uses to keep themselves looking good. With four treatment modalities of current available, there is no match in technology available.

MediLift \$15,000 (training included)

Radio Frequency is the new gold standard in skin tightening and body contouring. Using 6mHz of radio frequency energy delivered through a bipolar handpiece, this device produces the deep dermal heating necessary to create tissue changes in face and body. The RC Power is affordable and easy to use. On site training is provided with purchase, as well as marketing education to properly launch this incredible technology

RC Power Radio Frequency, \$14,995

Jet Clear is the new generation of microdermabrasion. Using high pressure saline as the delivery system, the Jet Clear system exfoliates with a pressure that approaches the speed of sound. This high pressure treatment can completely remove stratum corneum while simultaneously cooling the skin. This process leaves the client refreshed and the skin ready for product penetration. The Jet also uses high pressure to infuse a variety of therapeutic serums. To see the Jet Clear in action, log onto our web site.

\$11,995 (shipping determined by zip code)

Stratapulse Broad Spectrum Light Systems are the most cost efficient system available in the market today. Using multiple filters this system treats hair removal, vascular and pigmented lesions, skin rejuvenation, acne, and more. The newest technology in light filtration allows the user to confidently treat up to type 5 Fitzpatrick skin. Chilled tip and large spot size are wonderful features on this system, as well as a beautiful touch screen LCD. User interface is incredibly simple and cost of use is one of the lowest in the industry. Bulbs last up to 100,000 pulses and the power supply does not require any special setup. On site training is part of the purchase. You won't find a better system available for the price point that Stratapulse has.

Stratapulse Broad Spectrum Light

\$21,500 (shipping determined by zip code)
