**Amy
Business Owner,
Licensed Esthetician**
Aqua Touch changed my business completely. My clients love the results. I will never go back to traditional microdermabrasion.

**Terri
Business Owner,
Licensed Esthetician**
High pressure saline exfoliation is the best treatment I have ever used in the skin care industry. Microdermabrasion was my bread and butter for years, but I don't miss it at all now that I have this.

**RoseAnne
Business Owner,
Licensed Esthetician**
My business has grown in ways I've never dreamed of as a result of this technology. I strongly recommend this product. The cost per treatment is low and the results are high. There's nothing better!

**Pam
Esthetics Instructor**
Our skin care program has purchased eight of these systems and the results have been extraordinary. The crystal-based microdermabrasion systems are now obsolete.

Aqua Touch Professional Serums

Post treatment infusion of serums using the Aqua Touch provides results unmatched in the industry. Using the positive pressure of the Aqua Touch system these corrective serums get to the therapeutic level of your client's skin.

Hyaluronic Acid Serum

attracting up to 100 times it's weight, this serum is the overall favorite of our client's. Hydration has never been easier or more efficient.

Acne Purifying Serum

This salicylic acid based product is driven to the heart of the outbreak, causing fast acting results.

Vitamin C Serum

All skin care professionals know the benefit of using Vitamin C topically. The Aqua Touch system takes this treatment to a new level of results by driving the product deeper into the tissue.

Wrinkle Attack Serum

This cocktail of products works down to the dermal level to hydrate and correct with results that leave clients amazed.

Brite DePigment Serum

Using a combination of tyrosinase inhibitors, this serum inhibits new pigment formation following the exfoliation using high pressure saline.

Calming Facial Serum

Treating conditions such as rosacea can be easy and successful using the Aqua Touch. The exfoliation process using the device cools the skin dramatically and infusion with the calming facial serum allows the restoration and rebuilding to flourish.
